Origin composition of US immigrant arrivals

Share of all arrivals in the year, by country of birth

Arrivals identified from year of immigration (YRIMMIG), pooled across survey waves. Each country is shaded by its share of that year's total arrivals. 'None' means no recorded arrivals from that country in that year. Origin codes that aggregate several countries ('Americas' and similar) cannot be placed on a map; the share of each year's arrivals they account for are 5.8%, 6.0% and 7.1% respectively.
